Kidder's Gas Regulator.—Savvy 25 cent, with
a better light.

MANHATTAN GAS WORKS, Oct. 23, 1852.

The Gas Regulator, Dr. Kidder, is, in my opinion, the most
useful instrument for regulating the flow of gas to the burners
of which it is designed.

It is correct in principle, and will accomplish admirably the
object for which it was designed.

The Regulator will regulate the lights and as the pressure
at the meter is by this instrument, reduced considerably
below that on the street main, it will enable the consumer to
gain an equal amount of light at a smaller expenditure for gas,
for the less pressure under which gas is consumed, the greater
is the amount of light obtained.

CHARLES ROOME,
Engineer G. Gas Light Co.

Orders received at the Gas Regulator Co.'s office, No. 262
Broadway.
